

3rd Grade

H.W. Mountz School

Summer Academics 2020

Please encourage your child to read throughout the summer and help him/her maintain the attached reading log. They may read any material that interests them. The most important thing is that they keep reading. This will help students maintain the skills and strategies they learned in second grade. Below you will find a list of favorite third grade series and authors. Reading logs should be returned to the teacher in September.

In addition, children should be practicing addition and subtraction facts through 20. Knowing basic math facts will help students feel confident and make a smooth transition into third grade math.
