

# Pizza Day 2018-2019

## Snack Facts

***These snacks and more!***  
*(...with a gluten-free, dairy-free cookie option!)*

**\*\*All snacks are nut-free and have been made in nut-free facilities.**

Considerable effort has been made to choose snacks that include organic or whole ingredients, fresh fruit, and a focus on avoiding the following chemical, GMO or preservative ingredients...

**\*TBHQ, high fructose corn syrup, corn syrup, partially hydrogenated oil, non-organic wheat, bleached flour, processed sugar, potassium sorbate, etc.**

**Prices range from .50-1.50 with the bulk of the snacks at \$1.00.**

*\*TBHQ: FDA has imposed limits on % used. At high levels it is known to cause hyperactivity, ADHD, asthma, food allergies, liver effects and biochemical changes at very low doses. Chemical preservatives don't expel from the body as quickly so they have a cumulative effect.*
